

1st ANNIVERSARY WEBINAR

20 November 2020, 15:00-17:00 CET

Register [here](#)

EuroSea is a flagship European Union project supporting the implementation of the G7 Future of the Seas and Oceans Initiative. EuroSea helps stakeholders to co-design European ocean observing and forecasting services and products that deliver information and support decision-making in the areas of climate, coastal and maritime activities, and ocean health.

This EuroSea stakeholder webinar will bring together the project's funders and implementors as well as related European and global initiatives to discuss progress and look forward to a lasting legacy.

Join us at this short and informative webinar to discuss how to implement a user-focused, truly interdisciplinary, and responsive European ocean observing and forecasting system.

EuroSea has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 862626
