

2nd ANNIVERSARY WEBINAR

25 November 2021
15:30-17:30 CET

EuroSea is a flagship European Union project supporting the implementation of the G7 Future of the Seas and Oceans Initiative. EuroSea helps stakeholders to co-design European ocean observing and forecasting services and products that deliver information and support decision-making in the areas of climate, coastal and maritime activities, and ocean health.

This EuroSea stakeholder webinar will take place in the middle of the project's lifetime to take stock of the anticipated EuroSea impacts. The event will also discuss the legacy of the EuroSea work in the pan-European and global ocean science and policy landscape.

Join us at this short and informative webinar to discuss the implementation of an interdisciplinary European ocean observing and forecasting system, responsive to the European policies in the UN Decade of Ocean Science for Sustainable Development.
